

6 February 2012

ATEC at the FAKUMA 2011 Exhibition (Friedrichshafen, Germany)

The ATEC Group (ATEC) took part in the FAKUMA Exhibition in October 2011, Germany. This caps an exciting year for ATEC, with numerous appearances in plastics injection moulding exhibitions throughout Europe.

Featured prominently is the ATEC series of dual-component injection moulding machines. This DC series is available from 160 to 1060 clamping tons, in both standard and wide platen versions.

For more information about ATEC injection moulding machines, please visit www.atecgroup.net.

About ATEC Group:

ATEC offers innovative injection moulding solutions. Our cell-concept brings together machines, moulds and auxillary equipment for cost-effective production.
